

## → HOW TO CHOOSE YOUR ACTIVES

### • Actives range

Select your actives to meet your goals. Ask yourself what you would like to correct or prevent and choose the actives based on their function to create a personalized all-in-one treatment.

To make easier for you to choose, we grouped them by range.

To find out which specific active to choose from each range, follow the diagram created in the following page.

### ANTI-AGING

They correct and visibly repair the signs of aging, improving the appearance of the skin.

- Retinol 0.3%
- Niacinamide (Vitamin B3)
- Retinol 2%
- Pure peptides
- Lifting effect

### ANTIOXIDANT

They help prevent the signs of skin aging and improve the skin's overall appearance—basics in any combination.

- Ferulic acid
- Vitamin E
- Resveratrol

### IMPERFECTIONS

They smooth the skin, give uniformity, and correct imperfections (blackheads, pores...).

- Glycolic acid (AHA)
- Salicylic acid (BHA)

### TONE AND SPOTS

They brighten the face, improve tone, and visibly correct spots.

- Vitamin C

### REDNESS

Provide a soothing effect that helps skin return to its natural state.

- Bisabolol

### PROTECTION AND CARE

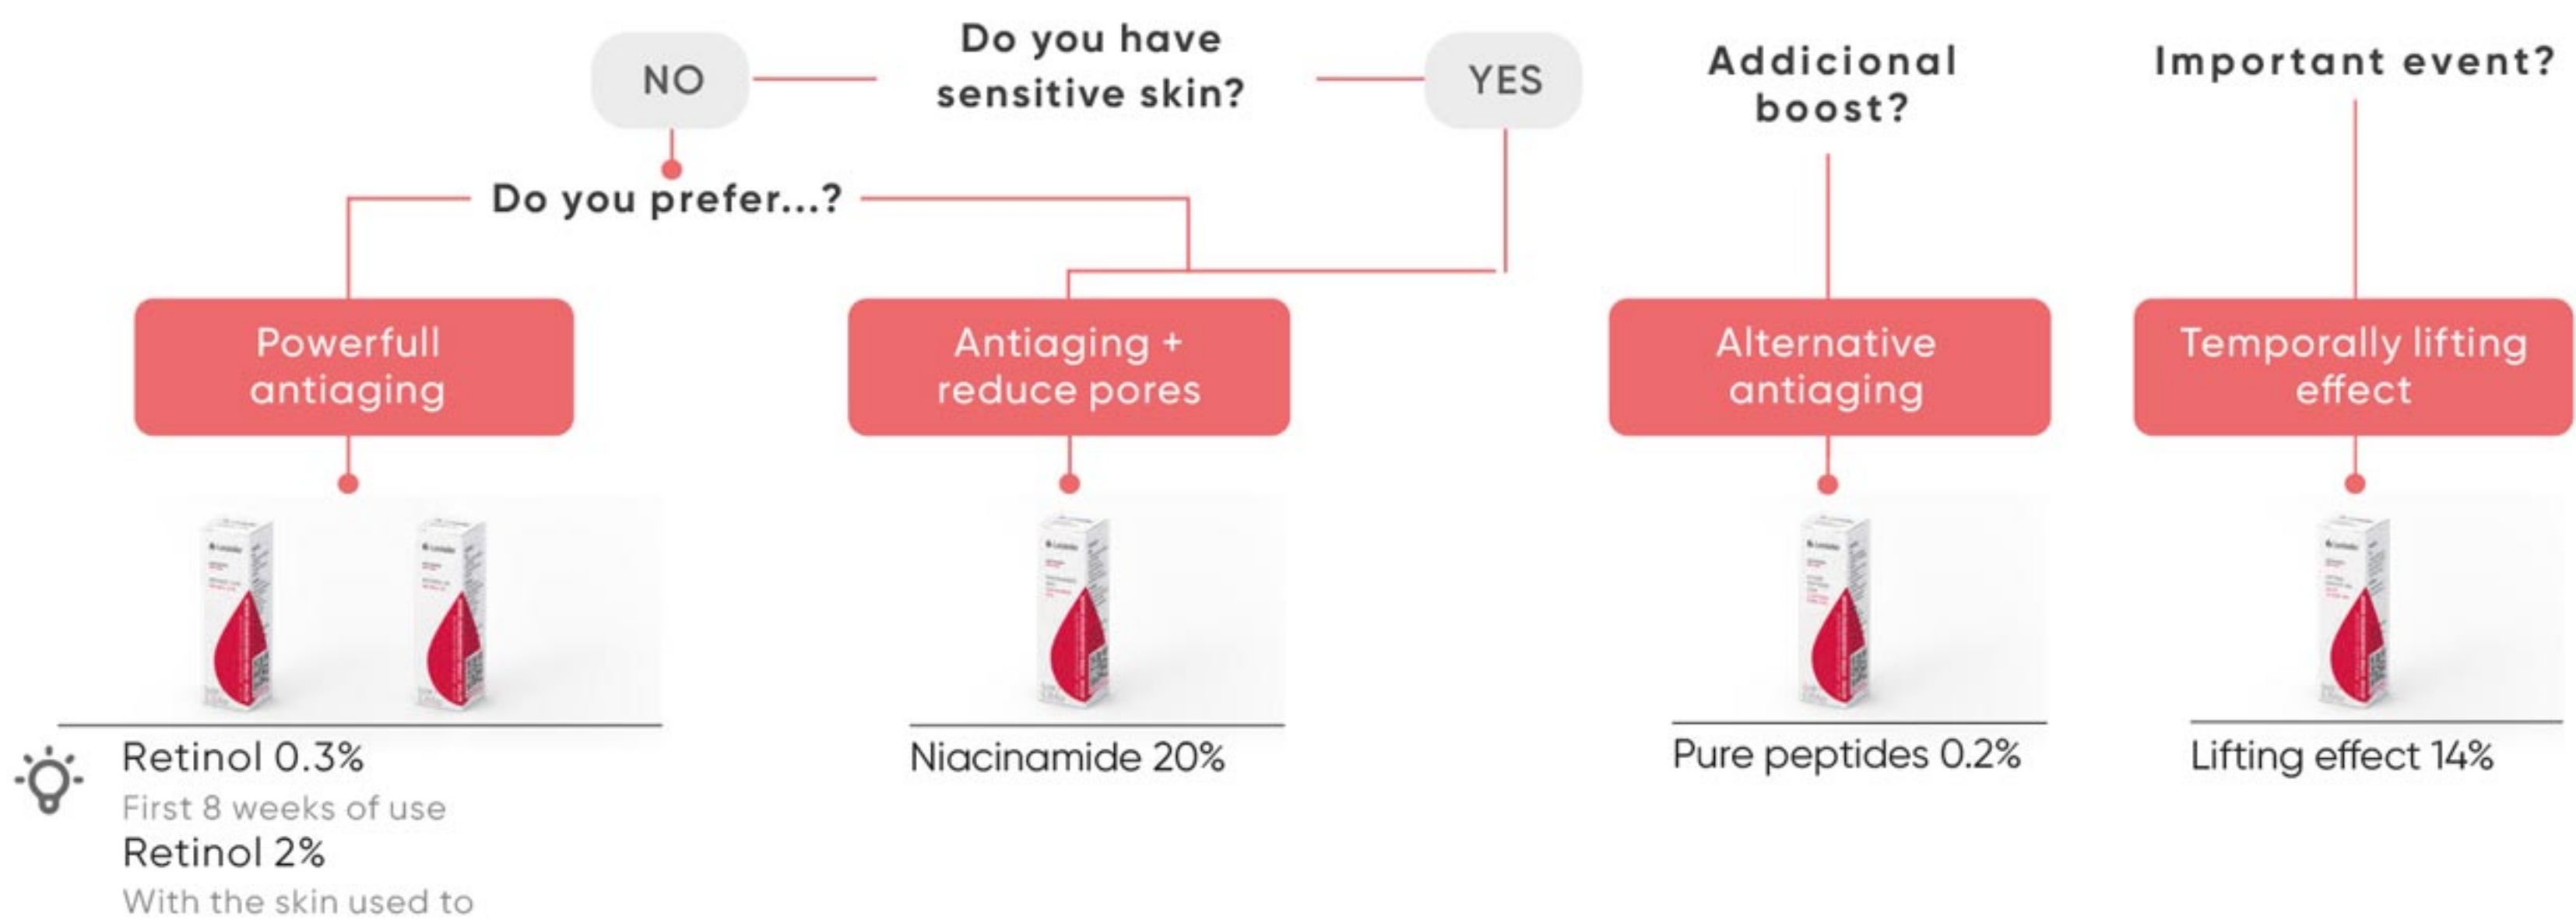

They take care of the skin and protect it from external agents.

- Antipollution
- Aloe Vera
- Argan Oil
- Hyaluronic acid

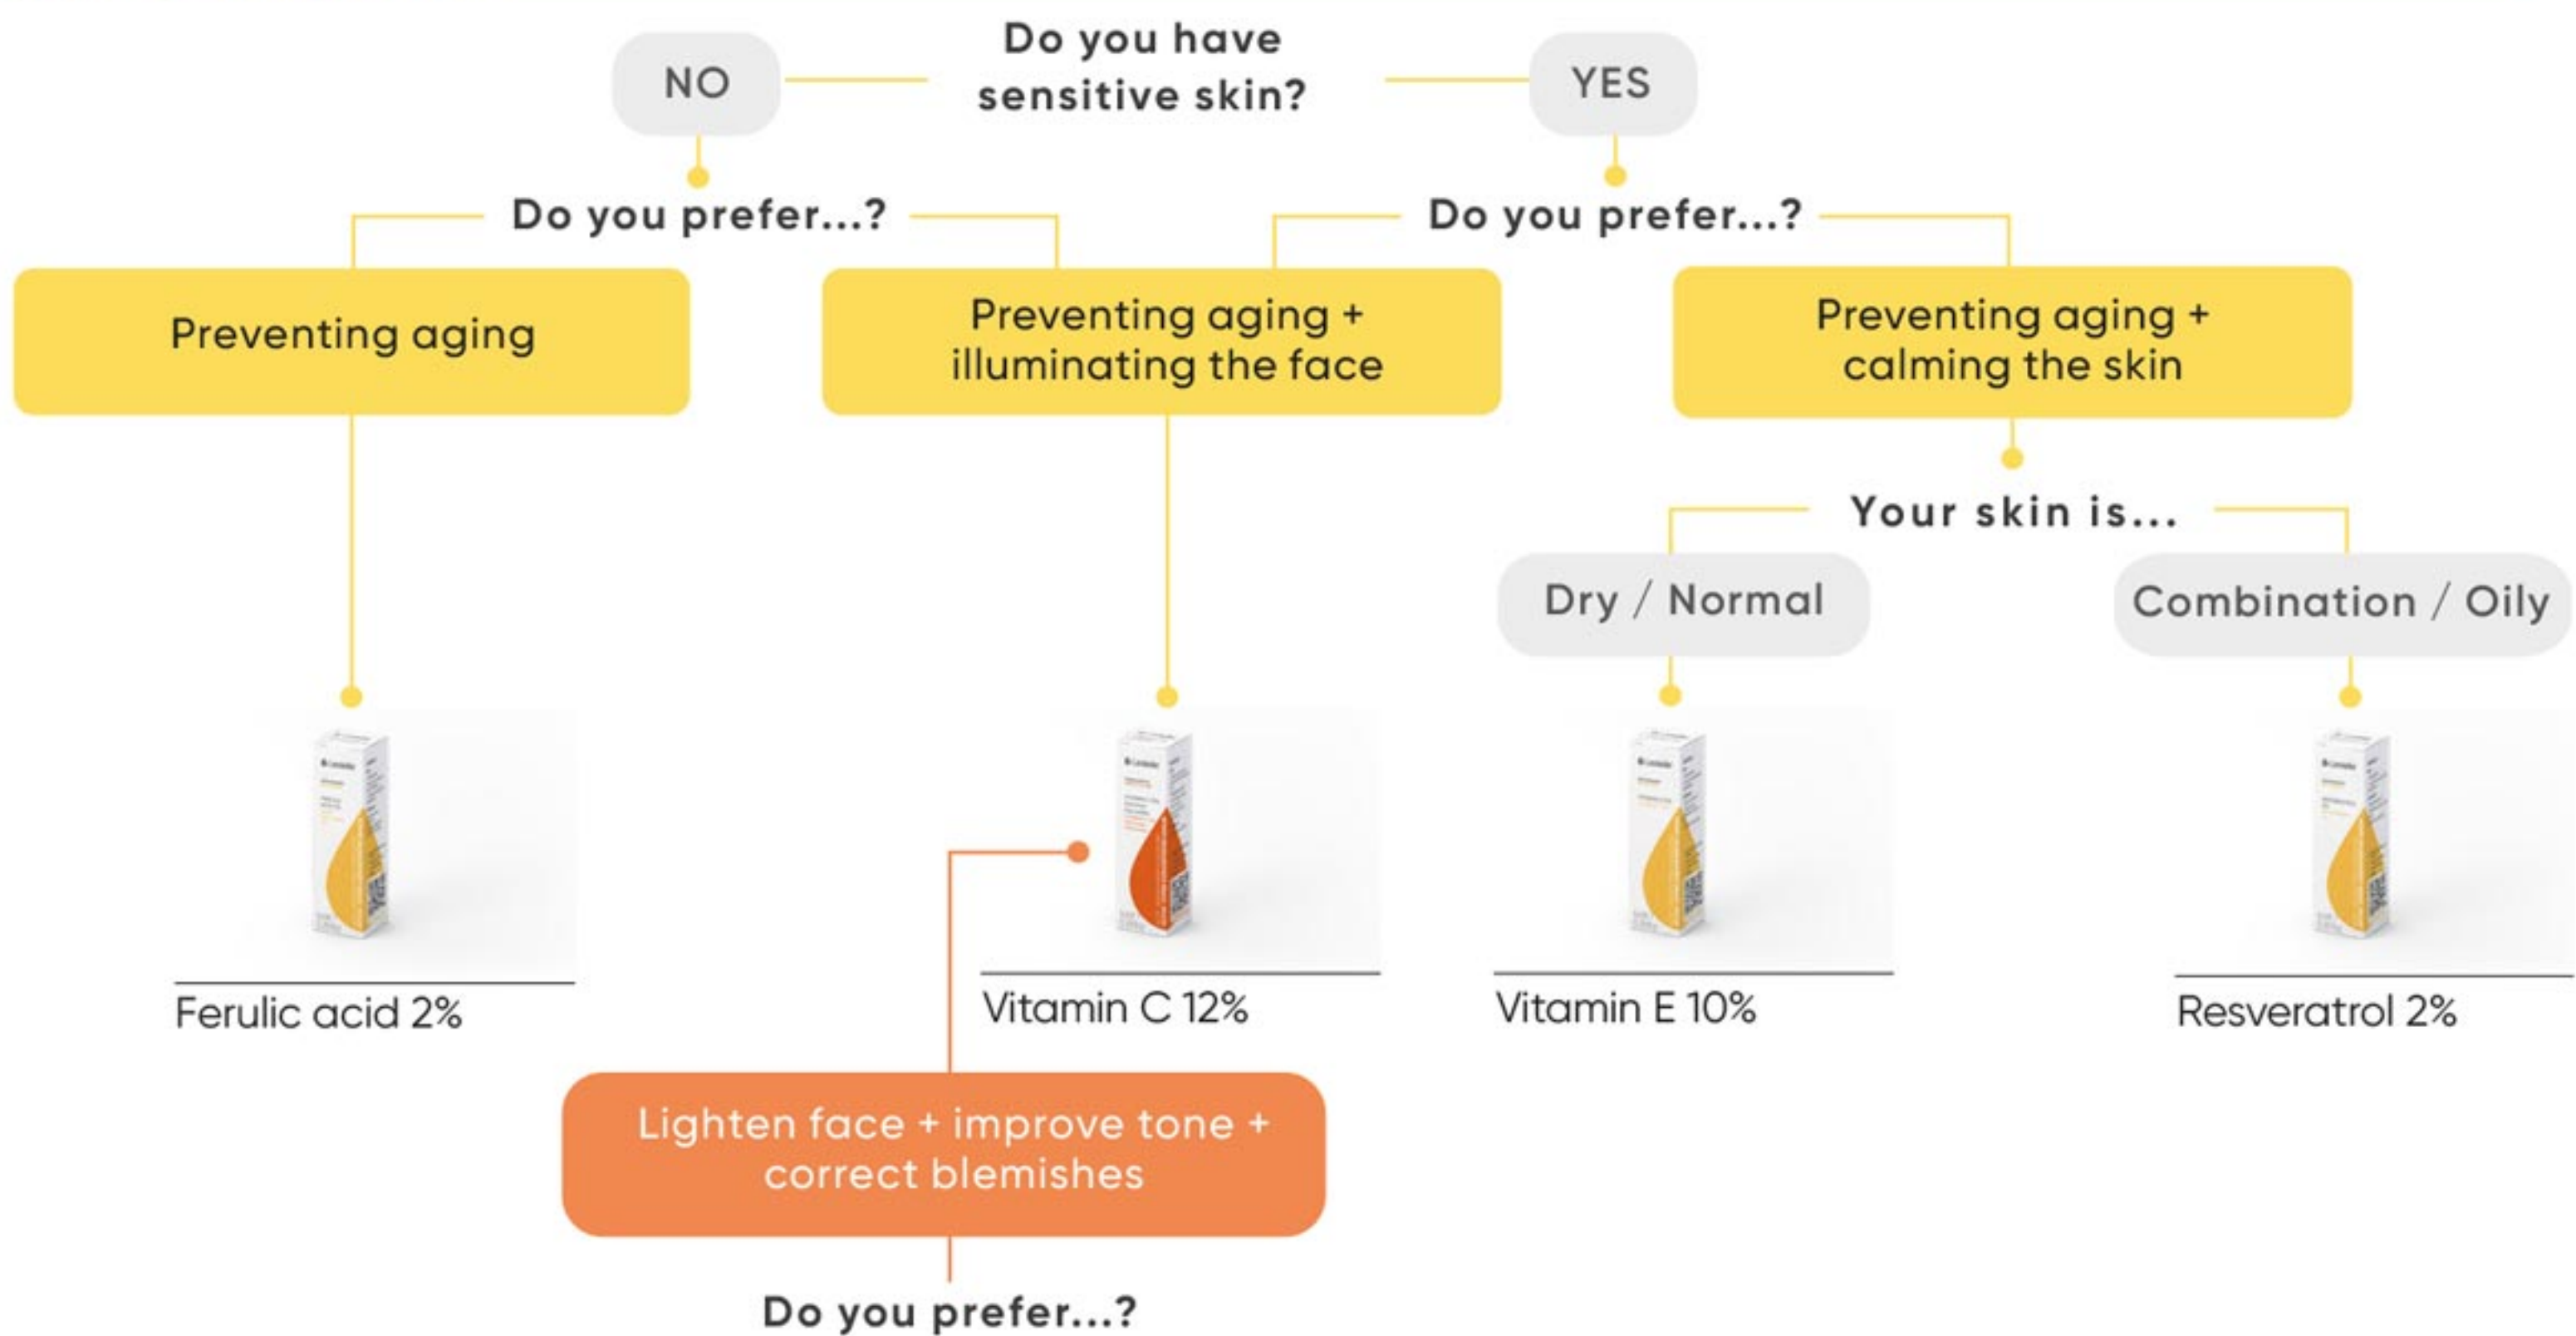

• **Actives diagram**

You always can take the online test or contact us if you need guidance through the entire process. However, this diagram will help you to select the best active ingredients you need to obtain the effect desired.

**ANTIAGING**

**ANTIOXIDANT**

**TONE AND SPOTS**

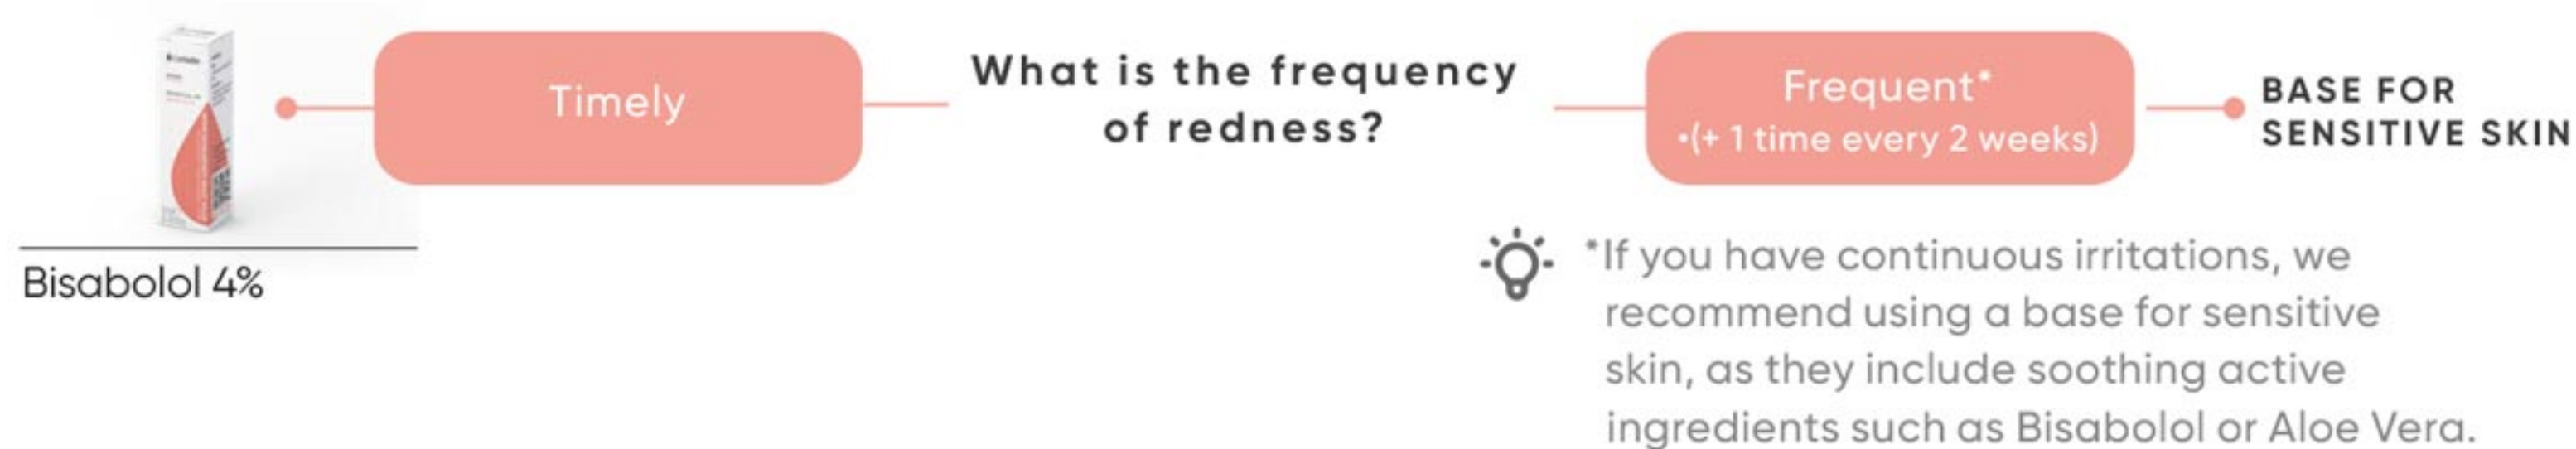

**Considerations to take into account after your choice:**

- It is recommended to add at least one active ingredient from the Antioxidant range to all treatments.
- It is recommended not to use two bottles of the same active in the same treatment.
- All cosmetic treatments on the market need time to show their effects. Give them at least 8 weeks. Some actives, such as soothing or moisturisers, have a faster effect, but others may need a little more time to see results.

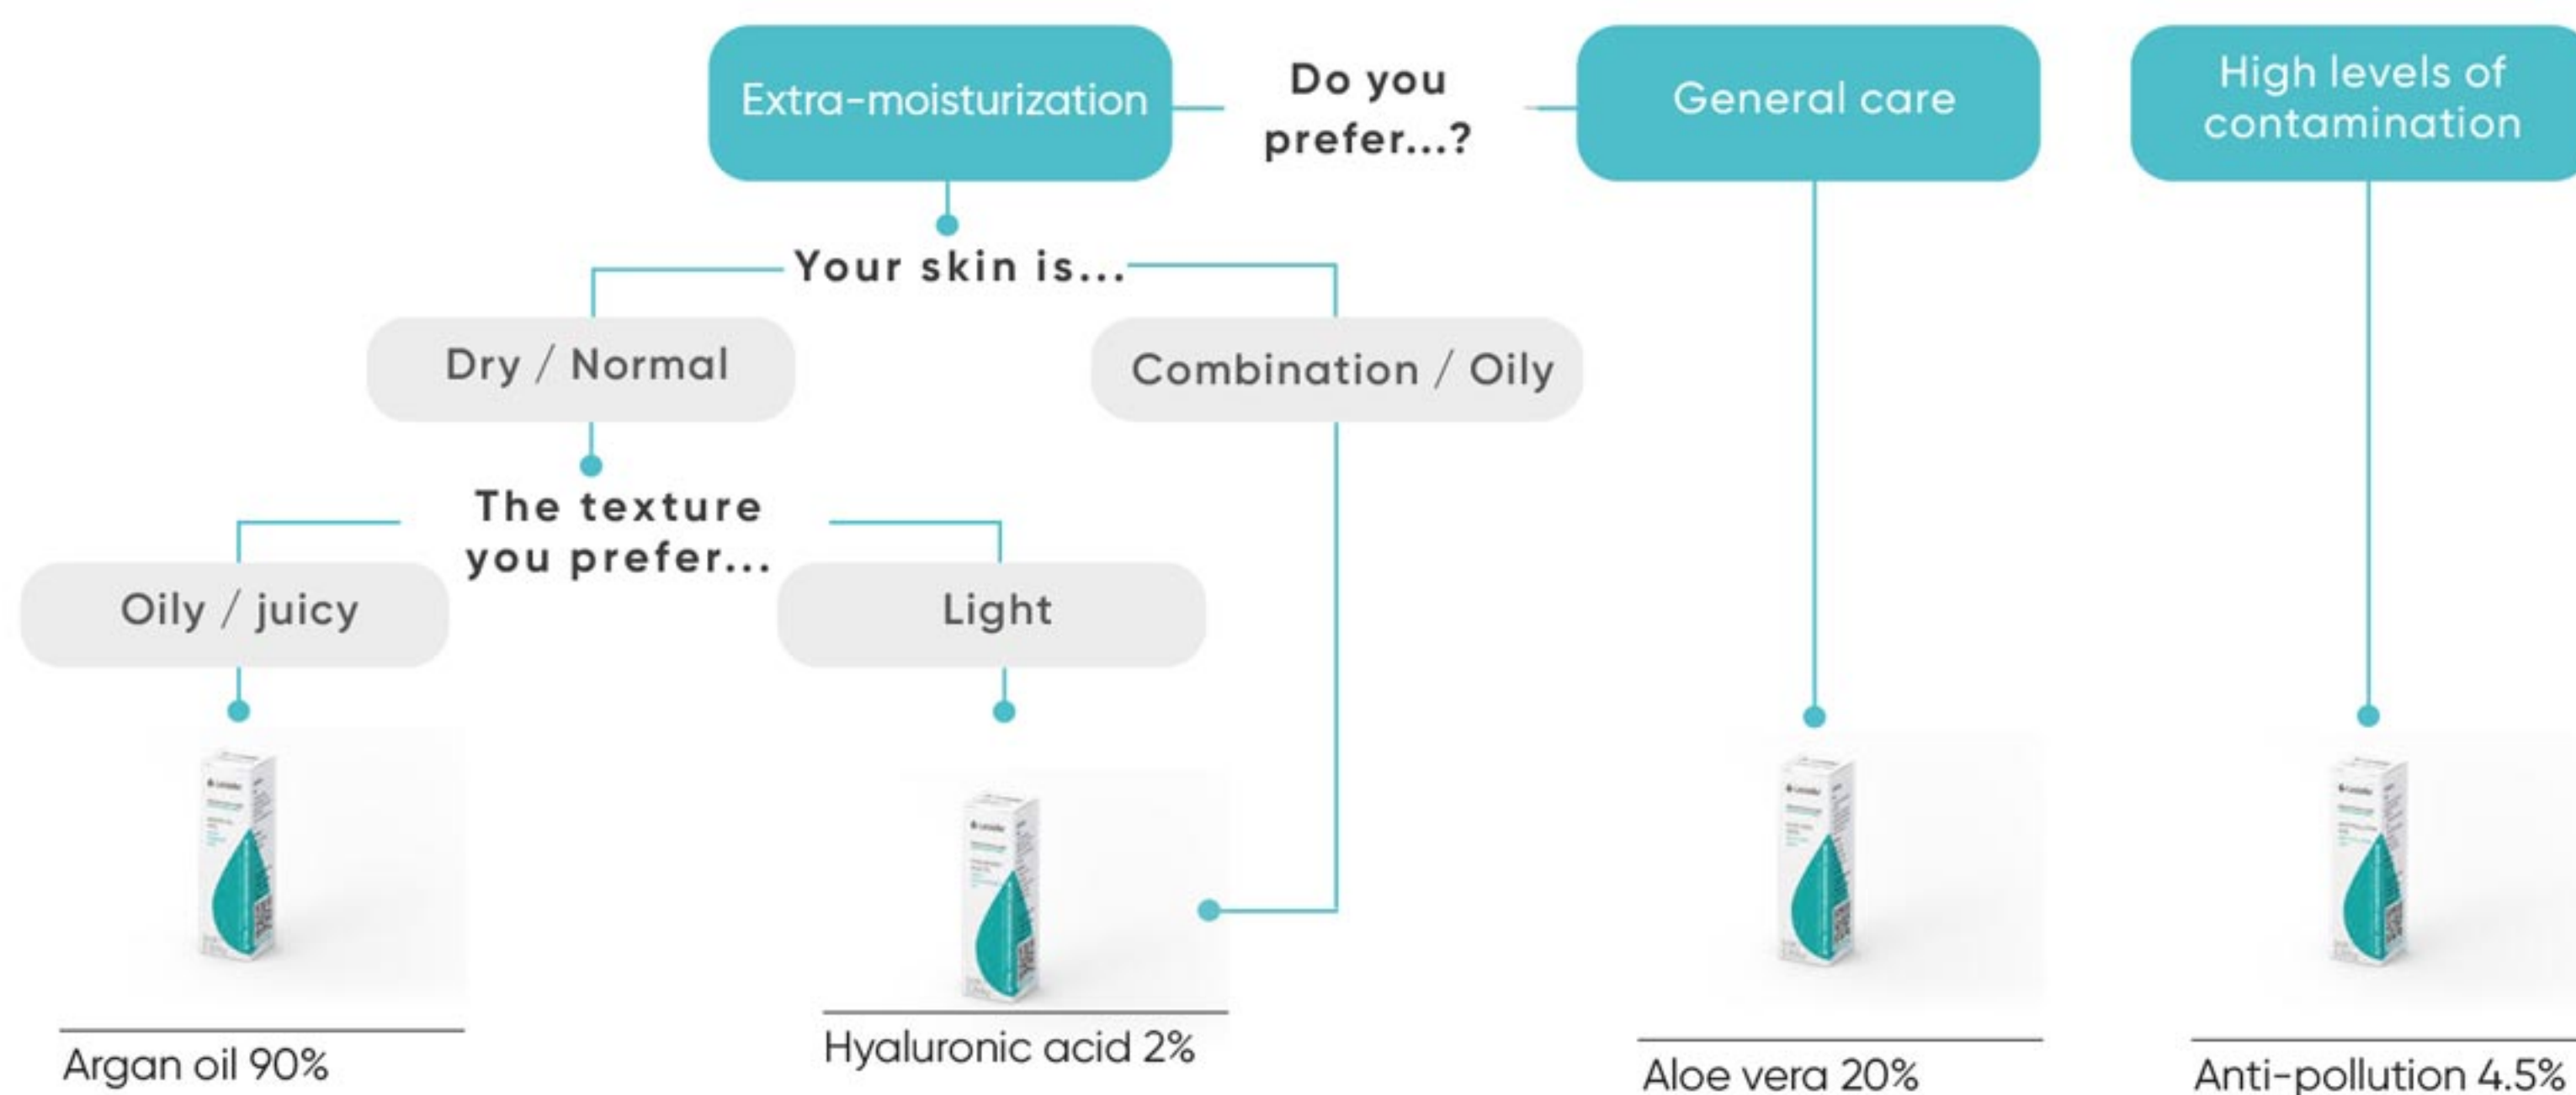

## IMPERFECTIONS

## REDNESS

## PROTECTION AND CARE

**💡** \*We only recommend using the "More hydration" option when you have already completed your first 6-8 weeks of usage and find that you require additional hydration from the product.

- You can choose more than 1 active per range if you want to reinforce a certain type of care with the only exception being those in the Imperfections range as they are exfoliating.
- If you are acne-prone, it is normal for a new treatment to cause a breakout at the start of use. It is known as "purge", a temporary and usually sign that the active ingredient is working.
